

Álvaro Guijarro Vera

Web Tech Lead | Senior Backend Developer

ABOUT

Senior backend developer with +11 years of experience in enterprise e-commerce, specialized in Magento 2 and Symfony 7. I have built online stores for international brands across multiple industries, as well as developed end-to-end applications integrated with point-of-sale (POS) systems and web platforms.

EXPERIENCE

Pronovias

Nov 2019 – Present

Magento 2 & Symfony Developer / Web Tech Lead

Joined as a Magento 2 Developer and contributed to the development and evolution of the group's e-commerce platforms, initially for Pronovias and later expanding the scope to six brands. Developed new features, maintained and improved existing platforms, and progressively took technical ownership of code quality, pull request reviews and release management.

Currently leading the web development team, providing technical leadership, supporting architectural decisions and overseeing system integrations. Led the end-to-end development of the Booking Tool, a Symfony 7 application for appointment and staff scheduling, integrated with the website and in-store POS systems across global retail locations. Worked across both backend and frontend development.

Würth

Jan 2017 – Nov 2019

PHP Magento 1 Developer

Started by maintaining existing Magento 1 code, later moving into development of new modules as a full stack developer. Took on responsibility for code review and enforcing best practices within the team.

esdemarca

Jul 2016 – Jan 2017

Backend Developer

Joined as a junior developer working on a CodeIgniter-based platform, focused exclusively on backend. Built new features for the company's custom admin panel to support business needs.

1mycom

Sep 2015 – Jun 2016

Backend Developer (Co-founder)

Co-founded a startup built on Symfony 2, working exclusively on backend development. First professional experience after completing vocational training.

Click Consulting Solutions

Dec 2014 – Mar 2015

Web Developer Trainee

Completed an internship working on web development projects using Magento, WordPress and other web frameworks, contributing across both frontend and backend development and gaining hands-on experience in building, maintaining and improving web applications.

EDUCATION

Postgraduate Degree in Web Application Development

2017 – 2018

Universitat Oberta de Catalunya (UOC)

Bachelor's Degree in Computer Engineering

2015 – 2016

Universitat Autònoma de Barcelona (UAB)

Certificate of Higher Education (HNC), Web Applications Development

2013 – 2015

Certificate of Higher Education (HNC), Microcomputer Systems and Networks

2011 – 2013
